Incident Response Development 2008

Goals and Objectives

Our goal in providing and participating in this course is to share knowledge between agencies in order that each agency learns what the other responders are capable of during an accident recovery. This will enable each agency to safely conduct themselves and work with the other agencies to provide the best working environment for not only the responders, but, more importantly, any and all victims during the recovery. By focusing on the victim, this bridges the gap that normally occurs between responders. This course is open to all law enforcement, firefighters, and towing professionals.

December 9th through December 11th, 2008 at the Ike Hamilton Expo Center

Morning Sessions (8:30am to 12:30pm) — mechanics & interactive learning

Afternoon Sessions (1:30pm until) — videos and presentations

Course Topics:

- Safety in Rigging
- Complete emergency response
- Extracation
- Environmental/Diesel Spill
- Equipment overviews and safety inspections
- Recovery demonstrations
- Safety videos
